[Ask a Question](#)

DVO-1-400 electric fan for cooling and creating the necessary thermal conditions for units and blocks of electronic equipment. Fans of the DVO series are single-phase, axial, single version, medium pressure. Guiding vanes - impeller are made according to a one-stage scheme. The operating mode is long-term.

Technical characteristics of the DVO-1-400 fan:

- Supply voltage, V 115
- Number of phases of the supply network ... 1
- Frequency of the supply network, Hz 400
- Phase-shifting capacitance, μF 0.33
- Nominal capacity, m^3 / h 70
- Total pressure at nominal capacity, Pa 500
- Nominal power, W 50
- Consumption current, A 0.46
- Rotation frequency, rpm 19900
- Average sound level, dBA 80
- Overall dimensions, mm 68x39

• Weight, kg 0.135

Operating conditions of fans DVO-1-400

• Vibration loads:

- frequency range, Hz 1-2000

- acceleration, m / s² 100

• Shock loads, m / s² 400

• Ambient temperature, ° C -60 +100

• Relative air humidity at 40 ° C,% 98

• Guaranteed operating time, h:

- DVO-0.5-400 3000

- DVO-0.7-400 and DVO-1-400 2000
